The 2019 SEAOSC Year-End Technical Summit promises to be a don't miss opportunity to advance your career and growth in technical knowledge. With three tracks focused on: BUSINESS PRACTICES & PROJECT MANAGEMENT, DESIGN, and EXISTING BUILDINGS. The summit will present important information you can use when you return to your office the following day. Be sure to register for the President’s Luncheon and Achievement Awards to immediately follow and join your colleagues to wrap up the 2018-2019 90th Anniversary Year for SEAOSC.

The 2019 President’s Luncheon & Achievement Awards program is dedicated to the significant contributions our volunteer members have made to the Structural Engineering Profession. Annually, the achievement of our committees and individual members leads to expanded engagement of structural engineers and recognition of the importance of this noble profession. As we conclude the official SEAOSC year, The President’s luncheon offers the opportunity to honor these important contributions, while looking forward to continuing the work behind these achievements and also includes the year-end report on SEAOSC’s activities, recognition of out-going and in-coming Board Members as well as acknowledging committee members. The event will conclude with the "Passing of the Gavel" to the in-coming President.
